

Memorandum**To: Admission Possible****From: ICF International****Date: January 4, 2010****Re: Findings from Program Audit of 2008-09 Admission Possible Outcome Measures: ACT Score Increases and College Acceptance Rate**

The purpose of this memorandum is to describe findings from the program audit of Admission Possible conducted by ICF during September through December 2009. Admission Possible contracted with ICF to perform an ***independent, third-party verification*** of two key outcome measures.

The purpose of the program audit was to verify ***two student outcome measures*** from the 2008-09 student cohort served by Admission Possible:

- growth in ACT scores from pre- to posttest periods
- college acceptance rates.

Admission Possible reported a 22% increase in ACT scores from pre- to posttest periods and a college acceptance rate of 98% for the 2008-09 cohort.

Findings

Following independent analysis of ACT scores, the program audit ***fully supports Admission Possible findings about ACT score growth*** of students from pre- to posttest periods. The 22% score increase for students in the 2008-09 cohort reported by Admission Possible was confirmed by ICF reanalysis.

The program audit ***fully supports the Admission Possible report of a 98% college acceptance rate***. The ICF program audit verified that 606 of the 612 students who applied to at least one institution of high education were, in fact, accepted.

Finally, the program audit to date identified ***no meaningful discrepancies*** in the ACT score or college acceptance data reported by Admission Possible.
